DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 21-26, 35, 36, 38 and 39 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The terms "linking means" and "transmitting means" and "adapting means" do not have clear support in the specification. Applicant must specifically provide where support for such language exists. Otherwise, these phrases must be deleted.

Claim Rejections - 35 USC § 103

3. Claims 21-26, 35, 36, 38 and 39, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Yuasa et al., US 6,085,238.

Yuasa discloses a virtual network system, e.g. VGA, a plurality of terminals, e.g. 205b1, and messages that are transmitted by implementing a delay time, e.g. col. 21, lines 34-51, to analyze and simulate information. Official Notice is taken that an actual location of a terminal, e.g. city name, zip code, global positioning system, terrestrial location and the various protocols used for transmitting the messages, e.g. WAP, have

been common knowledge in the art. To have provided such for Yausa would have been obvious to one of ordinary skill in the art.
